PROFILE

A flexible professional, self-learner, and highly motivated. With 3+ years of experience in software development, focused in front-end stack, certified by Microsoft, but with good skills in back-end and DevOps. I have also strong skills in design and user experience acquired in a bachelor's graduation in Architecture. Worked with large projects in insurance and banking projects for a multinational bank, always seeking to implement good practices in my work. This performance made me stand out, having become part of the bank's governance team, which guaranteed me a promotion with just under 2 years in the company.
